

Introduction to Innovative Projects in Physics Assignment 10

Name: Om Ashish Mishra

Registration Number: 16BCE0789

Question:

What would be your reaction if you suddenly acquire super power like “superman/wonder woman”? (use the tips that are acquired in brainstorming session).

Answers:

If I would be SUPERMAN...

I am a normal boy if I get a chance to become Superman then I will first fly and I see the world. The steps I would take are the following:-

- I would take the account number of the Swiss Bank people who have saved a lot of black money and I will then take these money and use them for a good purpose like opening an NGO.
- I would check for the people who have illegally taken the job positions through the sixth sense power and remove them and put some able person on that position.
- I would make people to plant more trees and use my super power to purify the salty ocean water and turn a part to glaciers. This will help in reducing global warming.
- I would help in making a third world countries and developing countries into developed countries.
- I would see each person does work and every person gets a meal to eat. At least three times a day.
- I ensure that people should not hurt animals in a way or the others.
- I would teach everybody are equal and same despite of colour, creed, race, gender etc.
- I would help UNO in better working.
- I would help countries suffered from earthquake, tsunami and other forms of disasters by supplying the basic requirements from other countries.
- I would be honest and be a good decision maker and would not turn my head from saving or helping out of revenge.
- I shall do my best at stopping CIVIL WAR, WORLD WAR III and COLD WAR.
- I would make rules to bang smoking, alcohol and other drugs and open NGOs to change such them through art of living.

THANK YOU
